Certificate of Attendance

This certificate is presented to

Maximus Tochukwu Anochirim

for attending the training course entitled

Bio-Image Data Science with Python

from 13th to 15th May 2024.

Leipzig, 15th May 2024

Dr. Robert Haase
Trainer
Center for Scalable Data Analytics
and Artificial Intelligence (ScaDS.AI)

Yvonne Weigert
Section Head
Wissenschaftliche
Weiterbildung

Course Objectives

- Understanding the fundamentals of Python programming.
- Gaining proficiency in image analysis techniques using Python.
- Learning the basics of machine learning for biological imaging data.
- Being able to conduct basic bio-image analysis projects on their own.

Completed Training Sessions

13th May 2024 | 3 teaching units (5,5 h)

- Python basics (1,5 h)
- File handling and working with images (1,5 h)
- Image processing basics (2,5 h)

14th May 2024 | 4 teaching units (7 h)

- Image segmentation (1,5 h)
- Feature extraction (1,5 h)
- Machine Learning (1,5 h)
- Tabular data wrangling (2,5 h)

15th May 2024 | 3 teaching units (4,5 h)

- Explorative data science (1,5 h)
- Data Visualization (1,5 h)
- Plotting using Seaborn (1,5 h)

Training Methodology

- Lectures with interactive discussions.
- Hands-on coding exercises and projects.
- Real-life biological data examples and case studies.
- Instructor-led demonstrations.
- Q&A sessions for addressing participants' queries.
